

Licensed Child Care in Muskoka

Is Good for All Children

Studies show that children who attend licensed child care centres or approved home child care before going to school have better social skills, are better able to handle new routines and are better prepared for the transition to Kindergarten.

Licensed child care will also help connect families with programs and services for their child and many child-focused services will come directly to a child care centre to work with a child who needs extra support.

"Licensed child care has provided my son with rich hands-on experiences that have encouraged him to talk and read. Because child care staff have supported his positive choices, he now excels in interpersonal skills, better communicates and cooperates well with others (which is important since he is an only child)."
